PROFESSIONAL SUMMARY

B.Sc. Data Science graduate with a strong foundation in cybersecurity, specializing in network security, ethical hacking, vulnerability assessment, and cloud security. Experienced in hands-on security labs, vulnerability analysis, and security-focused projects using industry-standard tools. Certified in Ethical Hacking and Google Cybersecurity, with a keen interest in identifying security risks, strengthening defenses, and developing practical solutions to real-world cybersecurity challenges.

EDUCATION

Sri Krishana Arts and Science College, *B.Sc. Data Science* Coimbatore

Boston Institute of Analytics (BIA), *Cybersecurity & Ethical Hacking Program*
Coursework: Networking, Cloud Security, IEEE Standards, Linux, Security Auditing, Web Penetration Testing, Mobile Application Security, AI Security, Vulnerability Assessment.

Metro Matric Higher Secondary School, *HSC & SSLC*

EXPERIENCE

Tessolve Semiconductors Pvt. Ltd., *Student Intern* 2025 | Chennai

- Developed BuySquare, a SQL-based monitoring system to streamline incident investigation and risk management processes, ensuring data integrity across 500+ records.
- Built dashboards to monitor operational risk and anomalies.
- Implemented standardized security documentation and reporting protocols, ensuring alignment with organizational compliance requirements and enhancing overall process automation.

RELEVANT SKILLS & COMPETENCIES

Cybersecurity:
Network Security, Vulnerability Assessment, Ethical Hacking, OWASP Top 10

Security Specializations:
Web Security, Penetration Testing, Cloud Security, Risk & Compliance

Tools:
Nmap, Wireshark, Burp Suite, Metasploit, Linux

Languages:
Python, SQL

CERTIFICATIONS

Cyber Security & Ethical Hacking
Boston Institute of Analytics (BIA)

Google Cybersecurity Professional Certificate
Issuer: Google / Coursera

Ethical Hacking Certificate
Issuer: Cisco

Google Cloud Cybersecurity Professional Certificate
Issuer: Google Cloud

AI Security Specialization
Issuer: Edureka

Fundamentals of Cybersecurity
Issuer: Amypo

PROJECTS

SecureLens AI, *AI-Powered Secure Code Reviewer*
Built an AI-powered secure-code reviewer using Python, RAG, Llama 3.1, ChromaDB, and OWASP/CWE/NIST knowledge to detect vulnerabilities and generate remediation guidance. Leveraged AWS and Azure cloud services to architect secure environments, implementing identity and access management (IAM) best practices to protect sensitive data assets.

ShieldSense, *Real-Time Behavioral Anomaly Detection & Automated Alerting System*
Built a real-time behavioral analysis system detecting anomalous activity from live camera feeds using a multi-class classification model (87%+ accuracy) with automated alerting, applying anomaly-detection logic comparable to network intrusion monitoring.

WebSentinel, *Automated Web Vulnerability Scanner*
Developed an automated web vulnerability assessment tool using Python to execute security checks, reducing manual effort by streamlining vulnerability analysis and reporting.

CirrusSec, *AI-Powered Cloud Security Assessment Platform*
Developed an AI-assisted cloud security platform to detect AWS misconfigurations, calculate risk scores, visualize potential attack paths, and analyze simulated CloudTrail logs. Integrated MITRE ATT&CK mapping, an AI security analyst, an interactive dashboard, and PDF reporting using simulated cloud data.
