Mohamed Shaheeth M

has successfully completed the online Specialization

AI Security

In this Specialization, learners developed essential skills in generative AI and AI security, including understanding foundational architectures, identifying vulnerabilities, and applying strategies to defend against adversarial attacks. The program emphasized securing large language models (LLMs), implementing responsible AI practices, and mitigating risks in real-world systems. Learners completed hands-on projects to analyze threats, design safe AI workflows, and demonstrate secure deployment of AI-powered applications, preparing them for advanced roles in AI development, cybersecurity, and responsible AI adoption.
